Derossi takes great care to use materials able to provide the best performance. Our entire range is made with AISI 304 - 18/10 and AISI 316 austenitic steels. Thanks to the high percentages of chrome and nickel they contain, they give a particularly bright finish, and make the products extremely sturdy and absolutely resistant to rust and corrosion. The methods with which worktops can be built-in have become increasingly more varied and customized. Almost the whole range of Derossi sinks can be integrated into stainless steel worktops.
